Product Supply Update

Dear Valued B. Braun Customer,

We are pleased to share continued progress in our efforts to strengthen IV solutions supply and better support your clinical needs.

As part of our inventory recovery plan, we will be removing allocation levels for 67 IV Solution, Irrigation, Clinical Nutrition, and Injectable Drug product codes, effective July 15, 2025. This change will allow for full access to these products moving forward.

Additionally, starting with August allocations (effective August 1, 2025), we will be increasing allocation levels to 120% on 8 additional product codes within our IV Solutions and Injectable Drugs portfolio.

Table 1: Products with allocations being removed

Product Code	Product Description	NDC	Current Allocation Level	7/15 Allocation Level
DA4050	Acetaminophen Injection 500 mg/50 mL (10 mg/mL)	0264-4050-80	110%	Allocation removed

These changes reflect the ongoing improvements in our supply chain capabilities and the investments we've made in production capacity, workforce, and raw material availability.

These efforts, along with stabilizing market conditions, position us to better serve your clinical needs. Please allow a brief period (typically 1–2 weeks) for our distribution partners to adjust their systems and inventory flow.

We value your partnership and remain committed to providing transparent, proactive updates as the supply environment evolves. If you have questions or need additional support, please reach out to your B. Braun sales representative or contact our Customer Service team at 1-800-227-2862.

Sincerely,

Jerry Ditty
