

B. Braun Medical Inc.  
824 12th Ave  
Bethlehem, PA 18018

October 8, 2024

Dear Valued B. Braun Customer:

At the beginning of the COVID-19 pandemic, B. Braun Medical Inc. received FDA Emergency Use Authorization of its Outlook® ES, Infusomat® Space® Volumetric Infusion Pump and Perfusor® Space Syringe Infusion Pump for an additional route of administration beyond their original indications for use. B. Braun also received FDA Emergency Use Authorization of its Infusomat Space Volumetric Infusion Pump for medical ground transport. Please refer to the letter dated 4/13/20 sent to existing customers at that time outlining details for additional information.

B. Braun has worked with the FDA to voluntarily withdraw the Emergency Use Authorization for these devices. B. Braun requests that customers dispose of any fact sheets and documents outlining additional indications for use that may have been provided in association with this Emergency Use Authorization. Please refer to each pump's current Instructions for Use (IFU) for complete, cleared Indications for Use.

Instructions for Use for the Infusomat Space Volumetric Infusion Pump and Perfusor Space Syringe Infusion Pump can be located on the B. Braun USA website at [bbraunusa.com](http://bbraunusa.com). Instructions for Use for the Outlook ES is available upon request by contacting B. Braun Medical Affairs.

If you have any questions or to request paper copies of the IFUs, please contact B. Braun Medical Affairs at 1-800-854-6851 or [medInfo.us@bbraunusa.com](mailto:medInfo.us@bbraunusa.com).

Thank you for your continued partnership,

B. Braun Medical Inc.
