RE: COVID-19 Update

Dear Valued Customer,

In these unprecedented times, B. Braun is completely focused on supporting you with the products vital to patient care. We are sincerely grateful for the life-saving work being done in healthcare systems across the country. Your compassion and selflessness in the face of extraordinary circumstances serves as an inspiration to us all.

Please know that I, along with the entire leadership team, are constantly monitoring developments and taking action as needed to ensure that you have a reliable supply of products so you can focus on providing your patients with the highest level of care.

Following is an update on some of the steps we have taken to address this crisis:

- As you know, we have put many of our most critical products on a protective allocation of 105% of historical demand. We have done this to ensure that your demand and any additional volume you may require, is available when you need it. An updated list of specific products is included in this communication. We encourage all customers to continue placing orders according to their normal forecast, with the exception of an identified immediate need for additional product.
- We remain in close communication with our suppliers. Based on current inventory levels and anticipated shipments, we do not expect any impact on our pharmaceutical or device products for the foreseeable future. Our suppliers also understand their essential role in patient care. We are working with them to address any potential issues as a result of government ordered shutdowns.
- Increased safety measures for employees have been put in place across the organization, under the guidance of our Chief Medical Officer. Our manufacturing operations are considered essential businesses and those locations are following CDC recommended guidelines to help prevent spread. Other employees who have the ability to do so, have begun working from home to ensure social distancing. We have restricted all travel with the exception of critical customer or patient needs.
- We are maintaining an open line of communication with local, state and federal officials as needed to reinforce the critical need for our operations to continue and address any issues that could arise as a result of governmental ordinances.

Thank you for your continued partnership.

Stay Healthy,

Joe Grispo

Senior Vice President and Chief Sales Officer

DUPLEX:
