Call 1-800-227-2862 to schedule a demo or to order.
Better information leads to better accuracy.
- The large display provides constant feedback about the condition of current being delivered to the patient and the quality of the motor twitches being generated.
- This leads to highly accurate current delivery — especially at low current output (below 0.5mA) in close proximity to the target nerve.

Configure to your needs.
Quickly adjust settings to suit your technique or procedure with easy-to-navigate menus and convenient controls.

Enhance peripheral nerve block success.

Advanced Patient Safety
- Impedance Check - alarms you to unacceptable impedance levels that can be caused by a loose electrode cable or dry skin electrode.
- Threshold Current - depending on the pre-set impulse duration, outlined digits indicate that the recommended threshold current was under-run and the needle may be too close to the nerve.

Excellent Readability, Constant Data Feedback
Large screen with wide viewing angle lets you quickly see all important information.
- Stimulus amplitude in mA (large digits)
- Current range
- Stimulus duration in ms
- Stimulus frequency in Hz
- Load impedance in kΩ
- Charge delivered to patient

Fast Access to Common Settings
Instant set keys let you adapt important and frequently used settings to meet your needs.
- Amplitude range - mA
- Stimulus duration - ms
- (0.1, 0.3, 1.0 standard with 0.05 and 0.5 optional settings)
- Stimulus frequency - Hz

Precise Current Adjustment
Digital control knob provides precise, tactile current adjustment.
- Adjustment scale can be set so that either 1 or 2 knob turns traverse the entire current range.
- Current range can be fine-tuned from 0–5mA down to 0–1mA for greater control at low current output.

Remote Control Operation
Under-the-glove hand-held remote control allows easy current adjustment while working solo.

Easy Handling
Ergonomic shape fits perfectly in your hand for a secure and convenient grip.

Easy Menu Navigation
Arrow keys easily move you through menu options to adjust default settings to best suit your practice.

Stimulplex®
Enhance peripheral nerve block success.

From the World Leader in Regional Anesthesia...

Stimulplex® HNS12

Enhance peripheral nerve block success.

Better information leads to better accuracy.
- The large display provides constant feedback about the condition of current being delivered to the patient and the quality of the motor twitches being generated.
- This leads to highly accurate current delivery — especially at low current output (below 0.5mA1) in close proximity to the target nerve.

Configure to your needs.
Quickly adjust settings to suit your technique or procedure with easy-to-navigate menus and convenient controls.

Stimuplex® HNS12 Nerve Stimulator

Improve Outcomes with Increased Information and Accuracy.

Rated number one by Anesthesiologists.1
