SHARING EXPERTISE

Ready When You Are

"PEEL"

Peel foil strip from drug chamber.

"SNAP"

Fold container just below diluent meniscus and squeeze until seal between diluent and powder snaps open.

"SHAKE"

Shake diluent and powder thoroughly to mix.

"SNAP"

Squeeze folded container just below the solution meniscus to snap the second seal and release liquid into the port.

"GO"

Remove foil tab from set port and spike bag. Hang bag on IV pole.

Refer to product package insert for complete directions for use and prescribing information.

Designed for Safety and Convenience

- Designed to avoid delivering diluent without drug
- Removes the need for vial connections
- Stores at room temperature at point of care with 17+ months expiration dating

Two-Compartment Container
