

ONGUARD® CSTD DESIGNED FOR THE REAL WORLD.

BECAUSE THAT'S
WHERE YOU WORK.

CLICK TO LOCK

BECAUSE YOU WORK WITH HAZARDOUS DRUGS.

OnGuard was specifically designed to reduce healthcare worker and other's exposure to harmful drugs during compounding and delivery. The same drugs you work with every day.

And even though your work is hard,
your CSTD doesn't have to be.

That's why OnGuard was designed to be as easy to use as it is safe to use. It locks with a push instead of a twist. And it's simple click-to-lock technology lets you know you're protected when handling hazardous drugs.

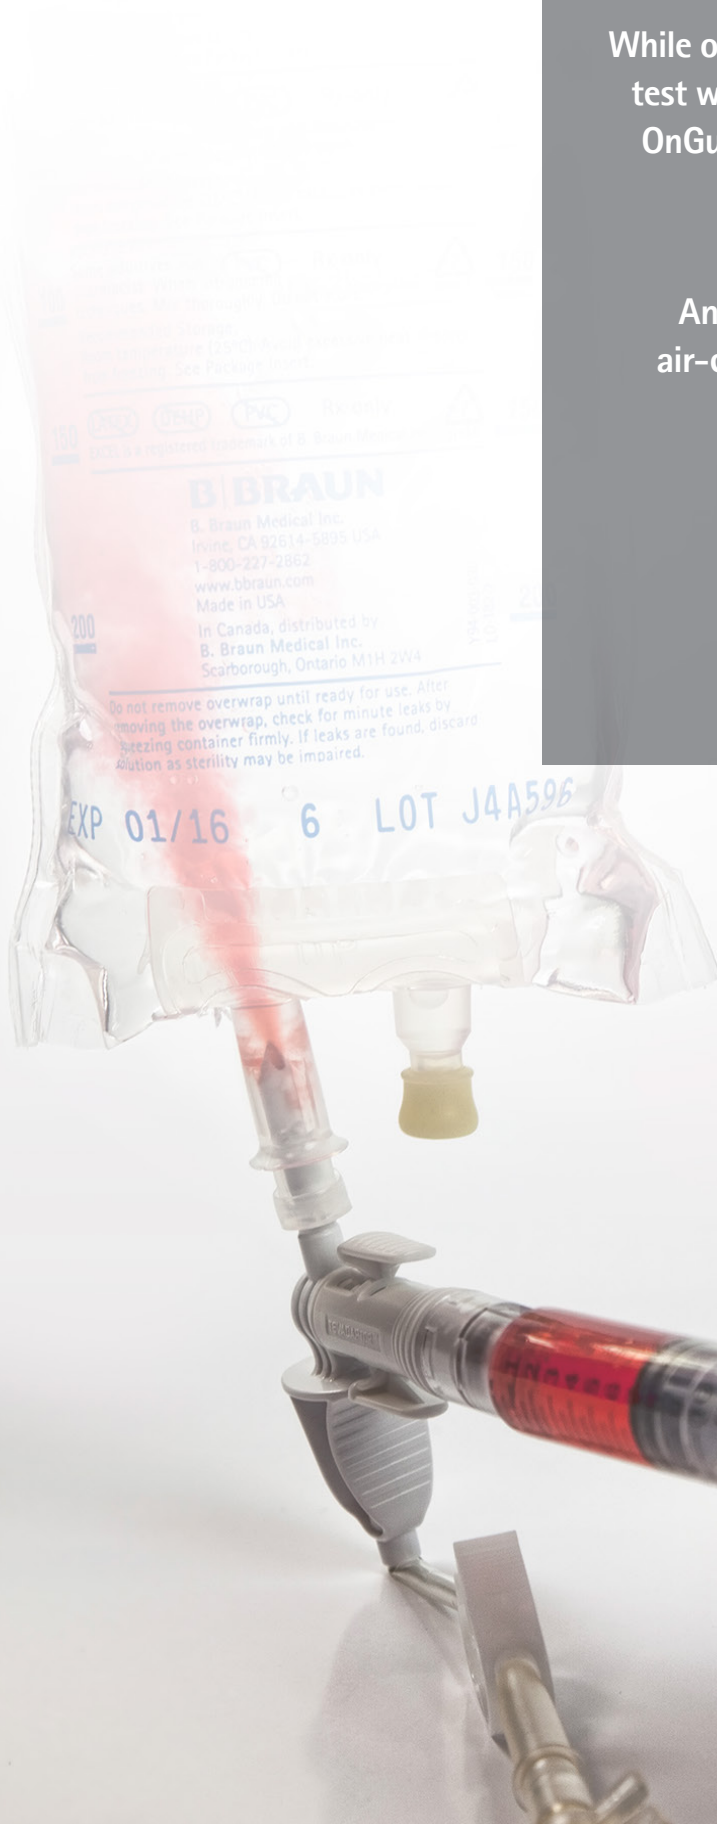

TESTED WITH HAZARDOUS DRUGS.

While other Closed System Transfer Devices (CSTDs) test with drug surrogates for vapor containment, OnGuard is tested with actual hazardous drugs.

In fact, it's the only CSTD tested with chemotherapy drugs.

And OnGuard is the market leader in CSTD air-cleaning technology—designed to prevent accidental exposure to pharmacists, nurses and others alike.

ONGUARD®
DESIGNED FOR THE REAL WORLD.
