ONGUARD®
CLOSED SYSTEM TRANSFER DEVICE
TESTED WITH HAZARDOUS DRUGS
BECAUSE YOU WORK WITH THEM.
THE FIRST CRITICAL LINE OF DEFENSE
FOR THOSE WHO PUT THEMSELVES LAST.

Like you, we believe that patient safety is critical. But your safety is important, too. That’s why there’s OnGuard®.

OnGuard is a Closed System Transfer Device (CSTD) designed to prevent accidental exposure to hazardous drugs to you, your patients and others. You can now meet the real-world challenges you face every day with confidence, knowing you’re protected.

TESTED IN THE REAL WORLD
Because you work with hazardous drugs, OnGuard was tested for vapor containment with them—using actual chemotherapy drugs including:

- 5-Fluorouracil
- Cyclophosphamide
- Carboplatin
- Doxorubicin-HCL
- Etoposide
- Paclitaxel

Designed to provide safety and protection as you deliver the best possible care to your patients.

SAFETY MADE SIMPLE
OnGuard is meant to be as easy to use as it is safe to use—helping to protect you from:

- Harmful inhalation
- Skin exposure
- Ingestion
- Accidental injection and needlestick injury

OnGuard’s powerful protection is designed to improve the safety of everyone handling and receiving hazardous drugs. That’s why it’s tested with those same drugs for vapor containment.

It’s CSTD protection designed for the real world—yours.

SAFETY BY DESIGN
OnGuard is the market leader in CSTD air-cleaning technology. And it’s built to reduce exposure to hazardous drugs.

All due to its unique features designed to put ease-of-use and safety first:

- Click-to-Lock Technology: An audible “click” helps confirm a secure connection.
- Membrane-to-Membrane Connection: Designed for a dry disconnect.
- Syringe Adaptor Lock: Nonremovable for an added layer of safety for nurses and patients.

MEET USP <800>
Thanks to its unique features, OnGuard also helps you meet the requirements of USP <800>, the new hazardous drug safety standard.
