

ONGUARD[®]2 CLOSED SYSTEM TRANSFER DEVICE

TESTED FOR VAPOR CONTAINMENT
WITH HAZARDOUS DRUGS

THE FIRST CRITICAL LINE OF DEFENSE

FOR THOSE WHO PUT THEMSELVES LAST.

Like you, we believe that patient safety is critical. But your safety is important, too. That's why there's OnGuard® 2.

OnGuard 2 is a Closed System Transfer Device (CSTD) designed to prevent accidental exposure to hazardous drugs to you. You can meet the real-world challenges you face every day with confidence, knowing you're protected.

TESTED IN THE REAL WORLD

Because you work with hazardous drugs, OnGuard 2 was tested for vapor containment with them—using actual chemotherapy drugs including:

- **5-Fluorouracil**
- **Cyclophosphamide**
- **Doxorubicin-HCL**

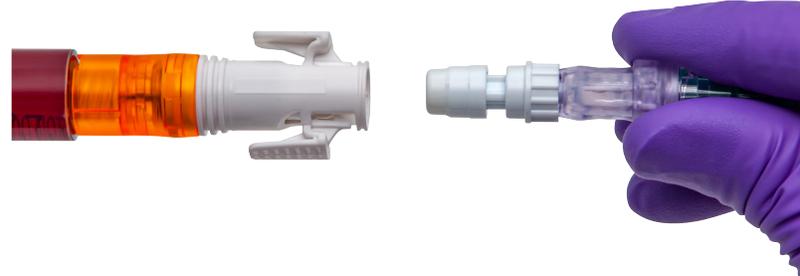

Designed to provide safety and protection as you deliver the best possible care to your patients.

SAFETY BY DESIGN

OnGuard 2 utilizes CSTD air-cleaning technology. And it's designed to reduce exposure to hazardous drugs.

All due to its unique features designed to put ease-of-use and safety first:

- **Click-to-Lock Technology:** An audible "click" helps confirm a secure connection.
- **Membrane-to-Membrane Connection:** Designed for a dry disconnect.
- **Syringe Adaptor Lock:** Nonremovable for an added layer of safety.
- **Modified raw material** to improve compatibility with known hazardous drugs.
- **Not made with DEHP or PVC.**
- Reduction in residual volume.
- **Luer lock adaptor** approximately 60% reduction in residual volume.
- **Upgraded spike design** allows for reduction of residual volume in IV bag.

SAFETY MADE SIMPLE

OnGuard 2 is meant to be as easy to use as it is safe to use—helping to protect you from:

- **Harmful inhalation**
- **Skin exposure**
- **Ingestion**
- **Accidental injection and needlestick injury**

It's CSTD protection designed for the real world—yours.

MEET USP <800>

Thanks to its unique features, OnGuard 2 also helps you meet the requirements of USP <800>, the new hazardous drug safety standard.
