OnGuard® 2
Closed System Transfer Device

Protecting healthcare workers
at every connection point

B BRAUN
SHARING EXPERTISE

Advancing Protection for Pharmacists Handling Hazardous Drugs

OnGuard® 2 is a closed system transfer device (CSTD) designed to prevent accidental exposure to hazardous drugs during compounding and administration. It's built to support confidence through every step of the process.

Proven Protection

OnGuard 2 CSTD was evaluated for vapor containment under real-world conditions.

Tested with:

- **5-Fluorouracil**
- **Cyclophosphamide**
- **Doxorubicin-HCl**

Engineered for Safety

OnGuard 2 CSTD uses a drug-binding matrix as a mechanical barrier to help reduce hazardous drug exposure and support a sterile, user-friendly preparation process.

Product Features:

- Audible click-to-lock confirms a secure connection
- With our mechanical barrier technology, there is no need to pre-prime or pre-activate
- ToxiGuard® Drug-binding Matrix physically locks hazardous drug molecules and prevents the release of harmful chemicals into the environment
- Membrane-to-membrane design supports dry disconnection[1]
- Smooth, flat surfaces support effective swabbing and disinfection
- Compatible with known hazardous drugs
- Seven-day microbial ingress testing[2]

NOT MADE WITH DEHP OR PVC

Components

Vial Adaptor

Syringe Adaptor

Spike Port Adaptor

OnGuard 2 is a CSTD designed with ease of use in mind to help:[3]

- Save compounding time
- Reduce repetitive motion
- Maximize workspace with fewer components
